

Electrolytic supplement and energy reinforcement
of quick and easy assimilation

amigo[®] *fresh.* Strawberry flavor

THE FIRST MOISTURIZING DRINK FOR YOUR PET

DESCRIPTION

amigo^{fresh.}, is designed to provide dogs an effective hydration system, more effective than the water we supply daily. Ideal for recovering carbohydrates and electrolytes lost during a physical effort.

COMPOSITION

Each sachet of **amigo^{fresh.}** (5 g) contains:

Sodium Chloride, Monopotassium Phosphate, Zinc Sulfate Monohydrate, Manganese Sulfate Monohydrate, Glycine, Maltodextrin, Potassium Sorbate, Tricalcium Phosphate, Strawberry Flavor.

PROS	BENEFITS
Formulated with components for quick and easy dissolution in water.	✓ Allows to replenish the losses of electrolytes (sodium, potassium, chlorine, zinc). ✓ With the optimal amount of mineral salts to help replace what is lost.
To be administered before, during and after exercise.	✓ Avoid fatigue. ✓ It guarantees the replacement of electrolytes. ✓ It ensures good hydration.
Contains Glycine	✓ As a source of ergogenic help that increases athletic performance and muscle power. ✓ It helps in the absorption of electrolytes.
With Maltodextrin	✓ Ensures sufficient energy reserve (muscle and hepatic) to the body.
Flavored	✓ Quickly replenishes muscle glycogen. ✓ Stimulates water consumption.

MANAGEMENT AND DOSAGE FORM:

-For moderate or training activities or games:
Dissolve an envelope (5 g) of **amigo^{fresh.}** in 1 liter of water drinking, stirring and drinking to the pet.

- Dissolves two sachets (10 g) of **amigo^{fresh.}** in 1 liter of drinking water, stirring and drinking to the pet.

PRESENTATION:

Dispensing box of 20 sachets of 5 g each.
