Ophthalmic Solution

brillo[®]

Clean Eyes

INDICATIONS

- Eye washing and wetting.
Removal of foreign bodies.
- To remove impurities from the plinked and contour of the eyes.
- Helps decrease the spots that occur in the middle-of-the-eye edge.
- As supportive therapy, against eye injuries and infections.

PRESENTATION
Dropper bottle 120 mL

COMPOSITION

Guaranteed composition:

Each 100 mL of **brillo** Clean Eyes contains:

Boric acid	200 mg	EDTA	50 mg
Sodium Borate	100 mg	Sorbic Acid	12.5 mg
Sodium Chloride	900 mg	Demineralized water	C.S.P. 100 mL

HOW TO USE

Apply directly to the eye as necessary, in the form of a constant flow until the foreign substances and/or elements are completely removed.

In the case of stains by oxidation of tears, it is suggested applying 2 - 3 times a day, until decrease the spot for as long as necessary, doing massages descending with a gauze in the medial song of the eye.

ACTION MECHANISM

- Boric acid is a chemical with **mild antiseptic, antifungal and antiviral properties**, which has made this substance ideal for use in eyewashes.
- Sodium borate exerts a gentle cleansing and removing of spots action, which helps the removal and whitening of stains produced by tears and accumulates of impurities in the "edges" ocular mediums.
- It is an excellent adjuvant in the treatment of obstruction of the naso-lacrimal duct.
