

# Coccigan® D

## Diclazuril 2%

Oral suspension

### COMPOSICIÓN:

Each mL of Coccigan® D contains:  
Diclazuril..... 20 mg.

## The optimal dose of Coccidiostat

Coccigan® D is made with diclazuril at 2%, (20 mg/mL), for oral administration in cattle, pigs, sheep, goats and dogs, to control, prevent and treat coccidiosis.

### Advantages and benefits

- 🐾 Coccigan® D, implements a low volume single dose, therefore reducing costs and optimizing administration.
- 🐾 Coccigan® D, does not require withdrawal period regarding meat and milk, making it suitable for any stage of production.
- 🐾 Coccigan® D, assures maximum effectiveness, its ability to rapidly reduce oocysts contributes to a lower infection rate in other animals.
- 🐾 Coccigan® D, as a coccidiostat, has the ability to generate immunological memory.
- 🐾 Coccigan® D protects the intestinal downiness from the harms coccidiosis might generate, given its low absorption and its direct action.
- 🐾 Coccigan® D, total safety, the dose can be exceeded up to 40 times.
- 🐾 Coccigan® D, as prophylactic protocol in 3 to 5 days-old piglets.
