

Coccigan[®]-S

Oral Solution

COMPOSITION:

Each 100 g of Coccigan[®]-S contains:
Amprolium:..... 200 mg.

Parallel therapy which allows a comprehensive treatment of internal parasites.

Don't let the diagnosis be incomplete, remember: Coccidias might cause as much or more damage than other parasites.

Symptoms: They may go unnoticed or confused with those of other gastrointestinal and pulmonary parasites, and in acute cases with bloody diarrhea.

It acts effectively against:

- *Eimeria bovis*
- *Eimeria zurnii*

Immediate Action: Fast and intense effects.

Ready-to-manage solution: No mixing required.

Precise dosing: Oral dosing syringe.

Dose:

• **Cattle and Sheep:** 1 mL/20 Kg of weight for 5 consecutive days or as recommended by the veterinarian.

• **Birds:** 1 mL /1 liter of drinking water for 7 consecutive days. In the next 7 days 1 mL /4 liters water.

Presentation:

- 10 mL syringe.
- 100 mL multidose bottle with dosing syringe.
- 200 mL multidose bottle with dosing syringe.
- Bottle for 1 liter.
