

# Gestamax<sup>®</sup>

## COMPOSITION

Each 1 mL contains:			
PHOSPHORICOLAMINE	100,00 mg	ZINC SULFATE	1,13 mg
Phosphorus ion available	22,00 mg	Zinc ion available	0,46 mg
POTASSIUM IODIDE	1,10 mg	MANGANESE SULPHATE	0,80 mg
Iodine ion available	0,84 mg	Manganese ion available	0,29 mg
SODIUM SELENITE	0,34 mg	Excipients q.s.	1 mL
Selenium ion available	0,155 mg		

¡Five minerals complex which are closely related to reproductive performance!

 **maximum reproduction**

 **maximum performance**

PHOSPHORUS

IODINE

SELENIUM

ZINC

MANGANESE

- Promotes embryo survival.
- Fundamental for pregnancy maintenance.
- Improves sperm quality.
- Modulates ovulation and regulates oestrous cycles.

Reduces abortions and placental retention incidence.

Optimizes pregnancy rates to achieve one calf per year.

Increases milk and meat production.

# Gestamax<sup>®</sup>

**Increase your productivity !!!**

### DOSAGE:

Administer 1 mL per 20 kg (intramuscularly) during three days.

**Higher weight gains.**

**Increase of milk production.**

**Better reproductive indexes.**

**Better calves development during pregnancy.**

**Stronger calves.**

### PRODUCT PRESENTATIONS:

Bottles per 250 mL y 500 mL

**Provet**

Eficacia ante todo.

# Gestamax<sup>®</sup>

**¡Better results in sows' maternity performance!**

Excellent association with insemination schedules.

Better oestrus expression.

Better litters quality.

More litter per year.

With all the benefits of Manganese.

Mn

# Gestamax<sup>®</sup>

**¡Greater reproductive performance in mares and stallions!**

Better ovulation quality.

Ideal to join with insemination and embryo transfer protocols.

Less inseminations number per conception.

Appropriate supplementation for horses breeding.

With all the benefits of Manganese.
