Broad spectrum antimicrobial

Marbocat® 8

Marbofloxacin 8 mg

More Absorption! Best Dosage!

COMPOSITION

Each tablet of MARBOCAT® 8 contains 8 mg.

DESCRIPTION:

MARBOCAN and MARBOCAT are antibiotic products with a wide bactericidal activity. Elaborated with marbofloxacin, they are specially indicated for respiratory tract, genitourinary, dermatological and soft tissue infections.

GATOS Y PERROS
1,5 a 5,8 kg

More concentrated and effective dosage against infections.

Exact dosage administration, no tablet breaking is required.

Indicated for multiple infectious diseases in dogs and cats.

Easy to administer due to its excellent meat flavor!

Soft tablet for better esophageal transit, without inflaming its mucosa.

For the treatment of infections resistant to other antibiotics.

ADMINISTRATION AND DOSAGE:

The recommended daily dose of marbofloxacin in dogs and cats is 2.75 - 5.5 mg/kg.

INTERVAL OF LIVE WEIGHT	PRODUCT	DAILY DOSE
