

meloxic 2%

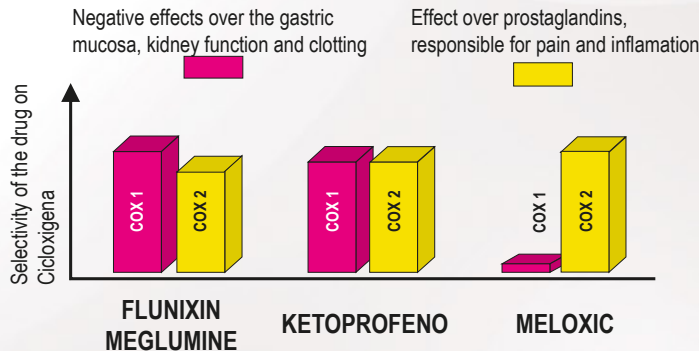

MELOXICAM

INJECTABLE SOLUTION

COMPOSITION:

Each mL **meloxic 2%** contains:
Meloxicam 20 mg

meloxic 2% is an analgesic and anti-inflammatory non-steroidal (NSAID) drug belonging to the Oxicam group, which acts preferably on COX-2 inhibiting prostaglandin synthesis, effectively generating anti-inflammatory, analgesic, anti-exudative, and antipyretic effects.

Benefits:

- Preferential inhibitor COX-2, therefore does not prejudice the gastric mucous or generates any kidney damage. Prolonged therapeutic action: controlling pain for more than 20 hours.
- Effective analgesic, anti-inflammatory and antipyretic effects.
- More than 98% fixation to plasma proteins
- Low volume per dose. (Low cost)

Dose:

Horses:

Administrate 0.6 mg/Kg bodyweight (3,0mL / 100Kg) intravenously, apply a second dose within the next 24 hours if necessary .

Cattle:

Administrate 0.5 mg/Kg bodyweight (2,5mL / 100Kg) intravenously or subcutaneously, if necessary every 24 hours for up to 3 days.

Pigs: Administrate 0.4 mg/Kg bodyweight (2.0 mL / 100Kg) intramuscularly.

Withdrawal period:

Meat: Up to 15 days after the treatment is completed.

Milk: Produced during the treatment and 5 days after the treatment is completed.

Packaging:
50 mL bottle
