

# Jabón Pompas®

With fragrance  
fixative

## INDICATIONS

Profound cleaning and amazing insecticide effects regarding:

- Flea: *Pulex sp*, *Ctenocephalides sp*.
- Ticks: *Rhipicephalus sanguineus*.
- Louses: *Trichodectes canis*, *Linognatus sp*.

## INDICATIONS

**Pompas Jabón** is an insecticide product, deodorant and anti-septic ideal to control ectoparasites in pets, essential for a profound cleaning and direct insecticide effect.

## ACTION

**Pompas Jabón** is a BP PERMETRIN based ectoparasiticide, which is absorbed through the arthropods exoskeleton, stimulating the central nervous system, therefore blocking nervous impulse transmission and paralyzing the arthropod. Regarding adult insects it inhibits and modifies de oviposition and larvae hatching.

- Control the parasitic problem between one bath and other.
- Controls bacterial growth and fungus that may be harmful for the skin.

## COMPOSICIÓN

Each 100 g of **Pompas Jabón** contain:

Permetrine	1.00 g
Irgasan DP 300	0.25 g
Piperonyl Butoxide	1.50 g

## ADVANTAGES

- Higher insecticide and synergic effects thanks to BP PERMETRIN.
- Contains IRGASAN DP300 within its formula.
- Specially designed for pets (Dogs and Cats)

## BENEFITS

- Up to 12 times more efficient than regular insecticides.
- Inhibits fungus and bacteria growth process, which prevents infections and unpleasing smells.
- Regulates pH levels therefore maintaining a pleasing odour.
- Ideal for high performance animals, which undergo prolonged physical activity.
