

Singap[®]

Amitraz 20.8 % p/v

COMPOSITION

Every 100 mL of Singap[®] contain:
1,5-di(2,4-dimetilfenil)-3metil-1,3,5-trazapenta-1,4 dieno
Amitraz.....20.8g

Emulsifiable concentrate ideal for tick control in dogs.

- Controls all tick stages, therefore contributing to a far better epidemiological control.
- Contains high potency stabilizing agent which maintains the product's efficacy until its application.
- Controls pyrethroid and organophosphorus resistant tick strains.
- Produces a rapid detachment of ticks.

DOSAGE AND ADMINISTRATION

Singap[®], dilute 2.5mL per every 2 litres of water. Wash the dog with the dilution, keep in mind the dilution must have direct contact with the animal's skin. For small dogs apply 2 litres of dilution, regarding large dogs apply 4 litres of dilution. Do not rinse or wash the dilution off the animal.

APPLICATION FREQUENCY

According to infestation severity. Th dilution may be applied to mid-level infestations on dog pound's floor.

PRESENTATION

20 mL bottle
