

Singap[®]

Amitraz 20.8 % p/v

COMPOSITION

Each 100 mL of **Singap** contains:
 1,5-di(2,4-dimetilfenil)-3metil-1,3,5-trazapenta-1,4 dieno
 Amitraz.....20.8 g

Emulsifiable concentrate ideal for tick control in bovines.

- Controls all tick stages, therefore contributing to a far better epidemiological control.
- Contains high potency stabilizing agent which maintains the product's efficacy until its application.
- Controls pyrethroid and organophosphorus resistant tick strains.
- Contributes to a rapid and effective tick elimination.

ADMINISTRATION AND DOSAGE

Singap, Dilute 1 mL per every litre of water, apply with a sprayer pump. Keep in mind 1 litre of dilution must be applied per every 100kg of bodyweight.

APPLICATION FREQUENCY

Regarding *Rhipicephalus microplus*, apply every three weeks. In case of a severe infestation apply every 10 days until the infestation is controlled, afterwards apply every 21 days. Regarding *Amblyoma cajennense*, apply every 7 days.
