

Sinrat[®] Pellets

**Highly efficient single dose anticoagulant rat poison,
Ideal for pest rodents in any kind of environments.**

IDEAL FOR

The reduction and control of pest rodent population regarding sheds, pig yards, wineries, slaughterhouses, factories, flower crops, supermarkets, marketplaces, barracks, casinos, resorts, restaurants, cafes, schools, universities, houses and buildings.

ADVANTAGES

Highly effective even in low quantities.

Ideal against pest rodents.

Specially designed flavor;
pleasant for rodents.

Contains a security margin, which prevents humans
and domestic animals from consuming the product.

INDICATIONS FOR USE

Use as a bait in places that have shown sign of rodent presence such as: paths, cracks, droppings and material damage (use 20g per placing). Periodically alternate the baits between places. In order to prevent a new rodent infestation, it's ideal to maintain some bait in "critical points". Bait must be located in protected places given pest rodents do not feed in open places. Avoid strong odours in order to prevent product contamination; product contamination reduces efficiency.

PACKAGING

Dispenser box (Containing 20g envelopes).
